

# 4500 DUAL PWC JETSKI LIFT

IMM QUALITY  
— BOAT LIFTS —

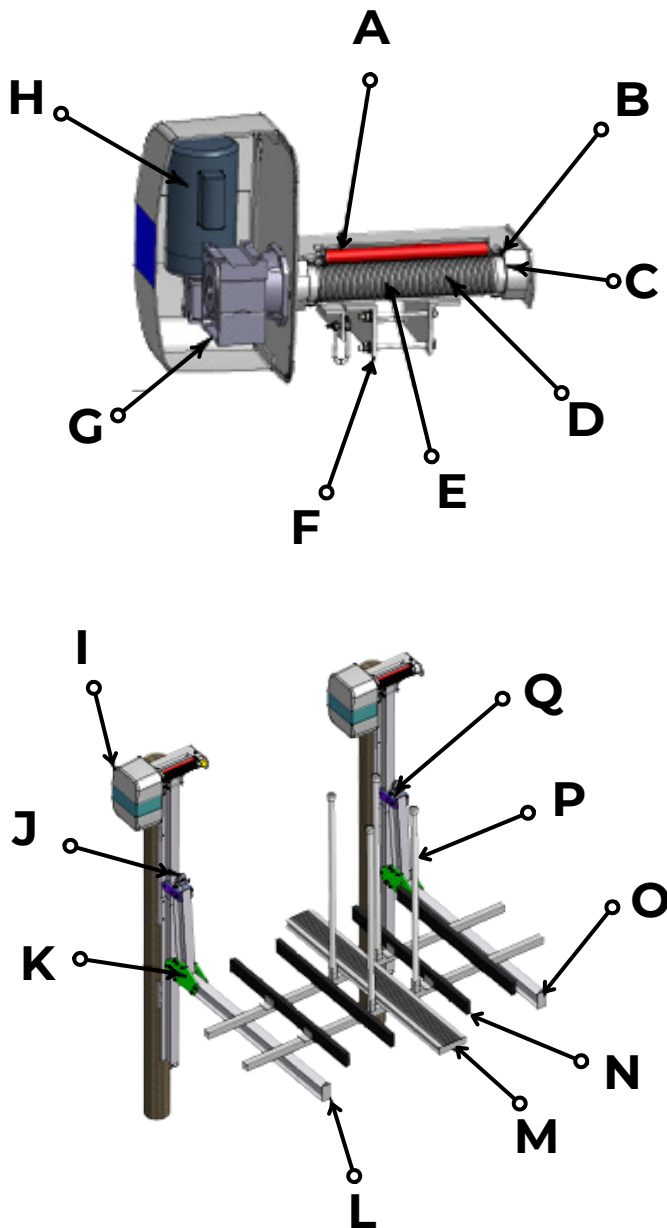

## 4500 Dual PWC Jetski Lift

The 4500 dual PWC jetski lift is built on an elevator boat lift platform. It has been fitted with a double PWC bunking kit to accommodate two jet skis. The 4500 double PWC jet ski lift for sale by IMM Quality Boat Lifts is available in both vertical and inclined models, along with the option of either single- or two-piece tracks.

A center walk plank is included with the 4500 PWC jetski lift to allow easy access to either watercraft. Also included are a pair of four-inch riser brackets, so you can float ski by yourself. IMM Quality Boat Lifts' superbly engineered, battle-proven designs are the best PWC jetski lifts you'll find in the industry!

# FEATURES AND OPTIONS

## Superlift Vertical Lift Standard Features

- A** Roller cable keepers prevent snarl and overlap.
- B** Engineered tribopolymer shaft bearings are lubrication and corrosion free. High load capacity provides industry best durability. These no maintenance bearings reduce service costs.
- C** Heavy gauge high torque capacity drive tube with Gatorshield electroplating to prevent corrosion.
- D** 3-1/2 diameter cable friendly grooved winder extends cable life. Grooves ensure proper cable winding. Industry best standard travel of up to twenty feet.
- E** Stainless steel aircraft cables.
- F** Easy install track mount brackets require no dilling.
- G** Sealed maintenance free double reduction worm gearbox.
- H** Continuous duty, high service factor electrical motor.
- I** Heavy duty rotomolded covers protect mechanical and electrical components from the elements.
- J** Maintenance free pulleys with self-lubricating bearings.
- K** Our carriage arms use heavy duty 1" thick gusset plates in this critical joint area. These gussets have CNC machined grooves to provide structural support and ensure correct geometry of the carriage arms. We weld this joint and use reinforcing bolts to construct the strongest carriages in the industry.
- L** Marine grade 6061-T6 corrosion resistant aluminum and stainless steel construction. Equipped with zinc anodes to protect against electrolysis.
- M** Aluminum access plank with non-skid surface.
- N** Fully carpeted pressure treated bunks.
- O** Arm end plates allow for convenient attachment of boat tie downs.
- P** Heavy duty reinforced guide post base with pvc covered guide post which are easy to adjust.
- Q** High durability molybdenum filled nylon roller wheels.

## OPTIONS

- Single or two-piece track
- Aluminum dock ladder
- Wireless remote controls, both standard and with auto stops

- Solar power
- High-speed version is twice as fast. Also available with the Platinum drive.
- Custom aluminum bunks
