

A white motorboat is shown on a lift at a dock. The boat has "DL 2775 AK" on its side. The background shows trees and a house.

# PLATINUM ELEVATOR LIFT

IMM QUALITY  
— BOAT LIFTS —

A sailboat is shown on a lift at a dock. The boat is white with a blue hull and a blue canopy. The background shows a sunset sky with clouds.

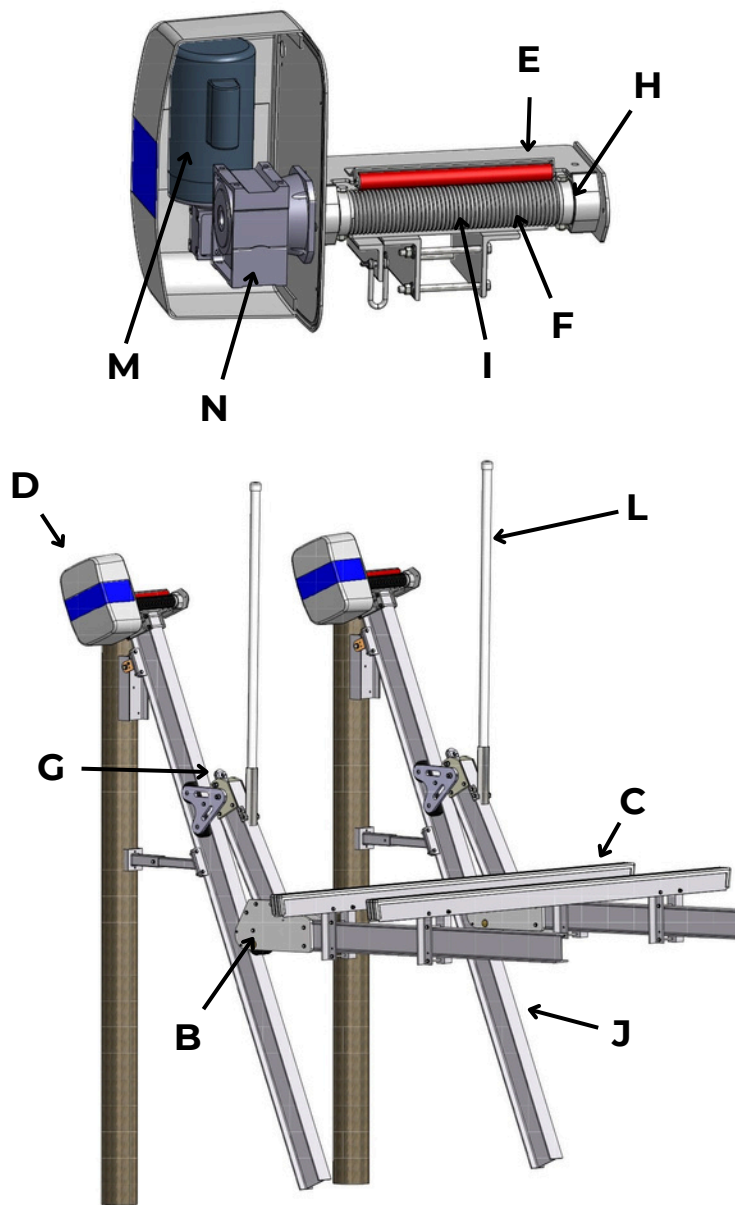

## Platinum Elevator Lift

Why settle for gold when you can own Platinum elevator boat lifts by IMM Quality? Superbly engineered gear-driven boat lifts, the IMM Quality Boat Lifts' Platinum elevator boat lifts outperform all other manufacturer's boat lifts. We believe these are the best Platinum elevator boatlifts you can find on the market, far exceeding the industry standard. In fact, IMM Quality Boat Lifts has never experienced the Platinum drives to fail for any reason, which is evidence of its legendary durability. The Platinum drive is an aluminum double-worm transmission for a maintenance-free, direct drive-to-shaft connection.

IMM Quality Boat Lifts takes pride in our engineering and product design expertise, along with our unique capability to thoroughly performance test our lifts before they leave our factory.

# FEATURES AND OPTIONS

A

## PLATINUM ELEVATOR BOAT LIFTS STANDARD FEATURES

- A** All aluminum and stainless steel construction
- B** Welded construction with grooved gusset plates and reinforcement bolting in key areas
- C** Our custom aluminum bunks, covered in white vinyl, are guaranteed not to float. Also, they are covered by a 10-year warranty against tearing, fading, mold and corrosion
- D** Heavy-duty, rotomolded covers enclose powerheads to extend product life by protecting the mechanical and electrical components from windblown rain and salt spray
- E** Only IMM Quality Boat Lifts uses grooved aluminum cable rollers to keep the cable tight on the winder and in the grooves, which dramatically increases cable life
- F** New extended travel winders allow 20 feet of travel standard and more with custom winders
- G** Maintenance-free aluminum pulleys with unique self-lubricating bearing
- H** Maintenance-free aluminum bearing blocks with no lube Igus bushings
- I** Stainless steel aircraft grade cables
- J** Sacrificial zinc anodes to protect against electrolysis  
Stainless steel hardware
- L** Heavy-duty reinforced guide post base with PVC-covered guide post that are easily adjustable
- M** Gem remote control with handheld transmitter enables in-water operation of your boat lift
- N** Maintenance-free double worm direct drive
